## Motorcycle Riding Techniques

*Learn the latest techniques in road riding safety from Nelson's most experienced and respected rider training organisation  
Our rider training specialises in road riding skills, accident reduction and risk management techniques. Education is the secret to safe riding.  
Learn in a friendly, low pressure environment, where you learn the skills necessary to keep yourself and others safe on the road, gain confidence and have FUN while riding!*

## **Learn to Ride**

The Roadsafes Learn to Ride course is for anyone who has not been on a motorcycle or scooter before or has had limited riding experience. Great also for existing scooter riders wanting to learn how to use the clutch and gears on a motorcycle. Includes lots of riding practise so you develop more confidence and skills.

The techniques learned here are fundamental to completing the Introduction to Road Riding - Basic Handling Skills course successfully.

## **Basic Handling Skills**

Gain your Learner Licence by completing the Basic Handling Skills course, which includes the Motorcycle Skills Test.

Roadsafe's Basic Handling Skills course not only provides you with coaching to help you pass your learner licence test, it also introduces survival skills for riding on-road now, and for successfully progressing to your restricted and full licence later. Returning riders find this is a great course to help them brush up on their basic riding techniques. Course participants can bring their own bike, or motorcycle hire is available with free use of helmet, gloves and wet weather gear if required. Basic Handling Skills 'Test Only' option is available for competent and experienced riders.

**Our Guarantee** - Complete our Basic Handling Skills course and we guarantee you will pass your test 1st time or the next test is free!!

## **Advanced Refresher**

Roadsafe's Advanced Refresher course is designed for riders wanting to improve their skills and confidence on road.

This is great for riders with years of experience riding on road but with no formal training, and awesome for those returning to riding wanting a refresher.

This course will provide you with additional practical riding skills, focuses on identifying and dealing with hazards, and how to anticipate and avoid the unexpected. Improve your cornering confidence, and learn how attitude and concentration affect your riding.

## **Performance Course**

For riders who have successfully completed their Advanced Refresher course.....the Roadsafes Performance course will take your riding to a whole new level.

You will gain improved performance from your bike – by improving your performance as a rider. You will be able to take these skills to every bike you own because you will now understand the dynamics of tyres and suspension, and you will know how to set up your bike for peak performance when cornering, braking, and carrying a pillion. You will also be introduced to the advanced skills of risk management, open road riding, overtaking, riding in groups, and take your cornering to a new level.

## **DIY Motorcycle Maintenance**

Are you apprehensive about tinkering with your bike? Get to know your motorcycle better!

Roadsafe's DIY Motorcycle Maintenance course provides you with a fundamental understanding of how your motorcycle operates and functions. Gain skills to work on your own motorcycle with confidence, and you'll take this knowledge to every motorcycle you ever own.

## **Licence Assessments**

Are you about to take your restricted or full licence practical motorcycle test?

Roadsafe can provide you with an individual On-road Riding Assessment, conducted over a variety of road conditions and situations.

## **Street Talk - Time Reduction Course**

A New Zealand Transport Agency Approved course in advanced riding and driving skills.

Successful completion of this course allows you to reduce your Restricted licence period by 6 months if you are under the age of 25, or by 3 months if you are over the age of 25.

Topics covered are:

- risk perception
- risk management
- self-reflection
- decision making
- goal setting and monitoring
